

Optim

Drop-In ID: OPDM-11.03.00-001
Product: IBM® InfoSphere® Optim™ Web Applications
Release: 11.3.0.0
APAR ID: IP23808

Date: Sept 08, 2014

Description: This iFix applies to IBM InfoSphere Optim Web Applications 11.3.0.0-38. The iFix corrects the following problem:

- Optim Manager displays exception reports in an XML format that is inconsistent with the format used for process reports.

Prerequisites: IBM® InfoSphere® Optim™ Web Applications 11.3.0.0-38

Co-requisites: OPDM-11.03.00-001 for IBM® InfoSphere® Optim™ Runtime Services
OPDM-11.03.00-001 for IBM® InfoSphere® Optim™ Designer

Supersedes: None

Special Notes: None

OS Platforms Corrected: Windows, Linux, AIX, Solaris

Corrective Actions:

Section I

How to install this iFix:

- Ensure that all Optim components are not running before applying this iFix.
- Start IBM Installation Manager.
- Select update option from the main main Installation Manager window or menu.
- Select OPDM-11.03.00-001 iFix under the IBM® InfoSphere® Optim™ Web Applications 11.3.0.0-38. If more than one iFix is found by Installation Manager, then all of them will be selected by default. Review each iFix and unselect any that you do not wish to install.
- Continue through the Installation Manager Update wizard to apply this iFix.
- Stop the Optim Manager Application.
- Undeploy the existing version of the Optim Manager war.
- Deploy the new version of the Optim Manager war.
- The iFix war replaces any previously existing war file and is therefore written to the same directory path as the original.
- Finally, re-deploy the Optim Manager Application war file for changes to take affect.

How to uninstall this iFix:

- Start IBM Installation Manager.
- Select the Uninstall option from the main Installation Manager window or menu.
- Select OPDM-11.03.00-001 1.0.0 iFix under the IBM® InfoSphere® Optim™ Web Applications.
- Continue through the Installation Manager Uninstall wizard to remove this iFix.

- Stop the Optim Manager Application.
- Undeploy the existing version of the Optim Manager war.
- Finally, re-deploy the previous version of the Optim Manager war.
- An uninstall of the iFix war will replace and revert the war file and will therefore exist in the same directory path as the original.

Automatic uninstalls:

This iFix is uninstalled automatically if there is no longer a package installed to which the iFix applies. This is checked during updates and rollbacks.
