Co-requisites: IBM® InfoSphere® Optim™ Designer 11.3.0.5a.20171110_1827 with OPDM-11.03.00-055

Supersedes:

Special Notes: You must drop the previous deployed Unified Optim War file and replace it with this war file.

OS Platforms: AIX, Linux, Solaris, Windows

Corrective Actions:

Section I

If more than one iFix is found by Installation Manager, then all of them will be selected by default. Review each iFix and unselect any that you do not wish to install.

Ensure that all Optim components are not running before applying this iFix.

Continue through the Installation Manager Update wizard to apply this iFix.

Drop the currently deployed Optim Unified War File in WAS-CE or your running web server.

Deploy the Optim Unified War File laid down in the web/apps folder.

How to uninstall the ifix:

Ensure that all Optim components are not running before uninstalling any iFix.

Start IBM Installation Manager

Select the Uninstall option from the main Installation Manager window or menu.

Select the iFix you wish to uninstall.

Continue through the Installation Manager Uninstall wizard to remove this iFix.

Drop the currently deployed Optim Unified War File in WAS-CE or your running web server.

Deploy the Optim Unified War File laid restored in the web/apps folder.

This iFix will automatically be uninstalled if you upgrade to a new version.
