Product name: **Backup Recovery and Media Services for iSeries V5R1M0: SI15944V5R2M0: SI16024V5R3M0: SI16025**

Product description: BRMS is the strategic IBM solution for backup, recovery, media, and storage management on an IBM eServer iSeries Server. IBM extends support for DR550 archive requests for iSeries and eServer i5 by enabling a PTF for the Backup Recovery and Media Services (BRMS/400) and utilizing the Tivoli Storage Manager (TSM) Client APIs. The PTF provides function for BRMS to store saved objects to TSM which have been enabled for retention protection. To enable this function, the following PTF will be required. The cover letter contains additional information on how to enable this function.

Supported geos: Americas, Europe, Asia Pacific, Worldwide

Headquarters location: New York, US
