

Comparex

Company overview: COMPAREX is an expert integrator of cost-efficient IT solutions. We offer group-wide the following range of platform-independent solutions: network storage, high availability, consolidation, migration, e-business infrastructure and printing. The core of our business model is independent consultation and integration of infrastructure-based solutions revolving around central IT. By partnering with leading manufacturers such as IBM, EMC, HP/Compaq, Sun Microsystems, and others, COMPAREX can - on behalf of its customers - manage complex projects as general contractor. Growing up in computer centers that were dominated for a long time by mainframe computers, large-capacity computers, COMPAREX is very familiar with customers needs for high-availability and security.
