IRIS Luxembourg

Company overview: I.R.I.S. develops and markets high-quality technologies, products and services designed to: 1. Capture the incoming (paper or electronic) documents of companies and government agencies, 2. Manage documents and their contents electronically, share and archive them internally or via the Internet, 3. Consult electronic documents efficiently and store them securely. I.R.I.S. was incorporated in Louvain-la-Neuve (Belgium) in the year 1987. The company has become a major player in optical recognition, data capture, electronic document management and document storage. I.R.I.S. has gained international renown as an exclusive or privileged supplier of technology for the large scanner manufacturers (HP, Kodak, Fuji, Samsung etc.) and has started subsidiaries in France, the Grand Duchy of Luxembourg and the United States. The group has built an extended network of distributors for its office products in Europe, the United States and Asia.

Core competency: Enterprise Content Mgmt Solutions - e.g. Documentum Connector

Product name: **IRIS ECM Documentum Gateway for DRx50 (or is this EDM)**

Operating environments supported

AIX®	Linux®	OS/400®	OS/390®	Microsoft® Windows®	Sun® Solaris®	HP-UX®	Novell® Netware®
x			x	Windows 2003 Server Windows 2000			

Product description: The product enables documentum 5 repositories to use DRx50 as storage device for repository content. The basic functions are: . documentum migration job to move documents to the DRx50 store, . documentum reader to retrieve documents from the DRx50 store, . documentum content 'purger' job to allow disposal of 'expired' objects in the DRx50. The product includes also a hash function which leverages DRx50 towards a CAS System. The hashing guarantees that documents are only stored once on the storage space, even if they are referenced many times in the repository.

Supported geos: Europe, Americas

Supported region: US East, Belgium, France, Luxembourg

Headquarters location: Belgium

Compelling differentiation:	Colette Darconnat, General Manager, IRIS Luxembourg comments: "This combined solution can allow customers to build solutions that help address compliance and legal requirements. IRIS gateway enables documentum repositories to use IBM TotalStorage DR550 for repository content. A hash module is also integrated into the gateway so that documents are only stored once on storage space even if they are referenced many times in the repository."
