

## Novipro

**Company overview:** For 12 years, Novipro has been guiding its clients through their IT projects. The exceptional quality of its services has driven Novipro's growth in recent years, propelling the company from \$1 M in sales in 1999 to \$42 M in 2005. This progress, in a mature market, has come as the result of our commitment to listen to our clients and propose the best possible solutions to respond to their needs. Novipro has built an extraordinarily skilled team of architects and project managers. The only company in Quebec to offer such extensive expertise in mainframe servers, we have adapted this competence to serve the needs of SMEs. We are therefore as adept at helping large corporate clients, such as METRO Inc., Videotron, Bombardier, and Desjardins, as we are at proposing robust, flexible solutions for small and medium-sized businesses.
