

Solutions II

Company overview: Today Solutions-II, Inc is a leader in the areas of storage and server consolidation and business continuance practices complimented by an award winning professional services organization. The Solutions-II team discovers, designs, deploys and manages systems through extensive engineering, knowledge transfer and documentation disciplines to allow customers to operate, expand and position their IT environment for future needs! Founded in 1992 by two data storage professionals; Solutions-II, Inc. dedicated itself to exploiting trends in the storage industry in three major areas: Sell storage as a strategic business decision instead of a commodity decision. Bring alternative storage solutions to customers incorporating specific advantages and positive impacts to the bottom line. Deliver proven solutions to a market that was experiencing explosive growth without industry standards in the areas of enterprise data storage.
