Product description: VERITAS Enterprise VaultT software provides a flexible archiving framework to enable the discovery of content held within email, file system and collaborative environments, while helping to reduce storage costs and simplifying management. Enterprise Vault manages content via automated, policy-controlled archiving to online stores for active retention and seamless retrieval of information. The built-in powerful search and discovery capabilities of Enterprise Vault are complemented by specialized client applications for corporate governance, risk management and legal protection. Implementing Enterprise Vault helps you reduce your business and IT risks surrounding: Application Storage Management; Compliance Retention & Discovery; Operational Excellence; Knowledge Utilization; and Upgrade, Migration & Consolidation

Supported geos: Americas, Europe

Compelling differentiation: Enterprise Vault offers industry-leading email archiving and a centralized archiving framework for information held in Microsoft Exchange (5.5, 2000, 2003), File Systems, Microsoft SharePoint Portal Server, Instant Messages, Lotus Notes Journal Email and SMTP environments. Central to every organization is the creation and ongoing management of the archive and its contents. Enterprise Vault software is designed to deliver the capability to securely retain archived data in such

a way that it can be fully exploited and expired when it is no longer required.
